

“ For me there was almost no downtime and I was able to get back to both my mom duties and full-time job very quickly.”

Tiffany
California

“ I would do it 100 times over again and recommend it to a friend.”

Kristi
Nevada

“ I was happy that it was a simple procedure with only minimal discomfort afterwards.”

Samantha
Connecticut

“ My patients can't wait to have Renuvion used again as part of their next treatment procedure.”

Diane Duncan, MD
Plastic Surgeon
Fort Collins, CO

A legacy of medical innovation

Renuvion® cosmetic technology is offered by Apyx™ Medical, an advanced energy company with a passion for elevating people's lives through innovative products in the cosmetic and surgical markets. Apyx, formerly known as Bovie® Medical, leverages decades of experience in plasma technologies and unique waveforms to meet the changing needs of today's patients and physicians.

renuvion®
COSMETIC TECHNOLOGY

The time is now.

Maybe you're celebrating a milestone birthday.

Maybe you're back on the job market...or the dating scene.

Maybe there's a beach vacation in your future.

Or you're done squeezing into shapewear, and you want your outer self to match your inner confidence.

Whatever your reasons, now is the time to consider Renuvion® cosmetic technology. It's an exciting new option that can be used during your next procedure.

What is Renuvion?

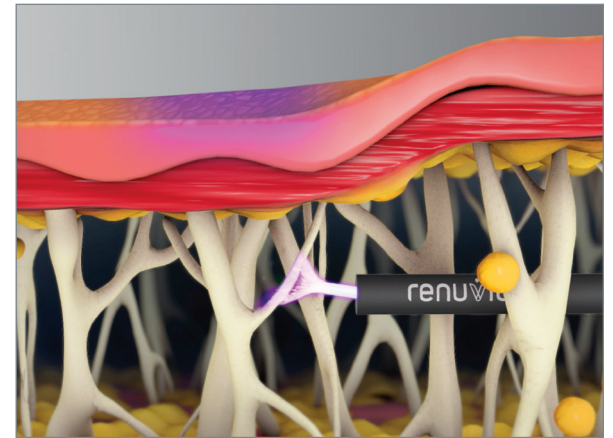

Renuvion cosmetic technology is the result of extensive scientific research and clinical development. Because of its proprietary balance of helium and RF energy, Renuvion has been described as ideal for medical procedures where precision and control are key to an effective treatment.

Since it was discovered to have a distinct tissue contraction effect due to its unique ability to provide controlled heat to the tissue,^{1,2} Renuvion has been embraced by Plastic Surgeons, Facial Plastic Surgeons and physicians specializing in cosmetic surgery. These experts in their fields are calling it one of the most exciting advancements they've seen in the last 20 years.³

How Renuvion works

Renuvion delivers even, controlled energy with exceptional precision.

Doctors use this novel technology to apply energy beneath the skin, causing a contraction effect that's gentle on tissue. The effect of the treatment may continue to improve over time and doctors often report that the contraction effect is noticeable immediately after the procedure.³

These illustrations depict where the Renuvion energy is used to contract the connective tissues just under the skin.

Good to know

Renuvion is used in a minimally-invasive procedure using small entry points.

Your doctor may perform the procedure while you are awake and comfortable with just a local anesthetic, or you may be asleep if your doctor thinks that's necessary.

Renuvion is a tool that physicians use to get results with lower risk and recovery time than with more-invasive surgery.

Talk to your doctor

Ask your doctor about Renuvion cosmetic technology. They can give you more details about how it works, what to expect, and what other patients have experienced.
